COMPLETE
LANDSCAPE
SERVICE

Franc P. Daniels, President

FOR years we have been producing on some of Minnesota's most fertile soil, a superior, high grade assortment of plant materials—Evergreens, Shrubs, Trees, Perennials. Our excellent service and high quality plants have pleased the most discriminating home owners in the Twin Cities, the Lake Minnetonka District, and throughout the Northwest.

Our business has been successfully built on a policy of satisfying our customers. Whether it has been a matter of furnishing plants or performing services our entire organization has been trained to keep the welfare of our clients uppermost in their minds.

In the many branches of landscape service which we perform, our workers are not only men well fitted through technical training and wide practical experience, but they have been schooled to give the public that careful and courteous consideration which they have a right to expect. Whether you drive into the nursery for your plants—whether you write in for an order of stock or whether we develop, plan and plant an extensive layout for you, your needs will have our most exacting attention—and whether you order one plant or a carload it is our aim to give you such satisfactory stock and service that in the future you will come back to us for your every nursery need.

We assure you that in all dealings in the future the same policy will be carefully carried out.

*Franc P. Daniels,
President.*

Let Us Help You
Plan Your Home
Grounds

Our Landscape Service is available even though your home is at a great distance. Just send us a sketch and full information as listed below. We can then prepare a detailed plan. With the information required, send us your check for \$5.00. The advance payment on plan will be applied on the purchase price as a credit when your order is received.

We need the following information to prepare a plan for your grounds. Please answer all questions fully.

- Give all dimensions of building and lot.
- Show location of building on lot and compass points.
- Show location of any trees or plants now on the place.
- Show walks, drives, terraces, objectionable view to be screened out, etc.
- Show where windows on first floor are, size of house, type of construction.
- Do you want shrubs entirely or some Evergreens?
- Do you want Hedges? Where preferred?
- Do you prefer certain kinds of plants?
- What is the character of your soil?

NOTE:—Your sketch need not be drawn to scale—just be sure to give us all correct dimensions.

The foundation of a successful planting is a correctly designed plan. May we help you by creating such a plan?

DANIELS HARDY APPLES

Daniels Red Duchess
Bears Even in the Nursery Row

Few apples bear at such an early age as DANIELS RED DUCHESS. The accompanying photo shows a small tree in one of our nursery rows bearing a full sized DANIELS RED DUCHESS apple with its characteristic even, brilliant red color. This habit of early bearing is one of the variety's many outstanding points of superiority.

DANIELS RED DUCHESS—A remarkable early red apple. An improved bud sport of the Duchess of Oldenburg.

The Daniels Red Duchess is an early red apple that seems destined to entirely displace the old Duchess of Oldenburg. It possesses all of the good qualities of the older variety and in addition that all important, price commanding quality of high red color. Coming as it does at a season when there is a dearth of red apples on the market, it has proven itself a commercial variety of exceptional value.

For the past 20 years it has been under the observation of the staff of the Division of Horticulture at University Farm. Professor W. H. Alderman, Chief of the Division, says: "It is unquestionably the most highly colored sport of the Duchess of Oldenburg known to be in existence. I can see no reason why commercial growers should continue to plant Duchess when this new sport is available in quantities to supply the demand." Recommended by the Minnesota State Horticultural Society in place of the ordinary Duchess.

Ever since we introduced the variety—ten years ago—it has proven exceedingly popular. It bears early, abundantly and regularly, frequently fruiting in the nursery row. For early apple satisfaction and profit plant Daniels Red Duchess.

RED DELICIOUS—Colors earlier and a far deeper red than the ordinary Delicious, of which this is a bud sport. Cannot be too highly praised. Large, deep luscious red—flesh of splendid texture and of the finest quality. One of the best winter keepers. Season November to April.

McINTOSH—One of the finest apples grown.

Because of its brilliant deep red color, delicate flavor, crisp snow-white flesh and distinct pleasant aroma, it is considered by most to be the finest dessert apple there is. McIntosh has proven eminently successful throughout the Southern part of the state and is at present one of the Northwest's most popular varieties. Season October to January.

*- And our trees are hardy -
Northern grower and
grower for the North, F.P.D.*

HARALSON

HARALSON—At last you can have a hardy red apple of fine quality that is a real winter apple. Haralson is Minnesota's only hardy, high quality, red, winter eating apple that will keep until late spring in ordinary storage. It has been correctly called the Northwest's best winter apple.

The tree is an upright grower with strong, wide angle crotch and branching system. It is a vigorous tree, very productive and resistant to fire blight. The fruit is about the size of a Wealthy, is borne at an early age, and hangs onto the tree until picked. The fruit is an attractive red in color and good in quality. Entirely hardy. No home or commercial orchard is complete without Haralson. Season January to April.

Minnesota Station Bulletin No. 230 in describing this variety says:

"It leaves nothing to be desired as a cooking apple and is a pleasant dessert fruit during the middle and late winter." Haralson is now generally accepted as the Northwest's best Hardy, red winter apple. Plant it freely.

WEALTHY—The best market and most popular home orchard variety in Minnesota. Fruit, medium to large; a beautiful red; flavor unexcelled. The Northwest's one best apple. Eating apple. Season, September to January.

WHITNEY CRAB—Good color. Crisp flesh and immensely pleasant flavor. Strong upright grower. One of the finest crabs for eating.

*Here are
the safest
and best
apple varieties.
F.P.D.*

NORTHWEST GREENING—The best and longest keeping of the greenings. A splendidly formed, bright green fruit. Should be in every orchard for, even in ordinary storage, they keep well all winter and in a good vegetable cellar sometimes on into the summer. Unexcelled as a cooking apple. One of the leading and most profitable commercial varieties in the southern part of Minnesota.

WEALTHY

McINTOSH

*Apple planting is a
wise move - now!*

*Old trees are going out fast and there have been few replacements.
F.P.D.*

DANIELS

Throughout Minnesota and the entire adjacent Northwest one can now grow plums the equal of those produced anywhere in the United States.

These splendid originations of the State Fruit Breeding Farm, after several years of thorough testing in both home and commercial orchards, are a proven success. They are large, luscious fruits of intriguing flavor. The trees are vigorous and hardy. They bear early and when properly pollinized produce tremendous crops.

The Superior (Minnesota No. 194) has been added to our list this year. It has just been named and promises to be a leader of the entire group.

One great advance made in plum growing this past season was the determination of what are the best of the pollenizers for each of these Minnesota varieties. Our State Experimental Station has shown definitely that it is absolutely necessary to have this correct pollinization if abundant crops are to be produced.

Daniels plums are strong, vigorous, well grown trees, large for their grades, strictly true to name and priced within the reach of all.

*- Don't forget a pollenizer. *P.O.*

SUPERIOR

PRICES

	1	10
Standard 3½-5 ft.....	.80	7.00
Large 4½-6 ft.....	1.00	8.50
Extra Large 5-7 ft.....	1.25	11.00

UNDERWOOD. The best of the older varieties, if any one plum can be so singled out. Early, large, hardy, with a rich red skin and firm, juicy, golden flesh of unsurpassed quality. A splendid, well formed, clean-cut looking tree.

RED WING. Mid-season. One of the largest and finest looking of the plums. Bears early, heavily and regularly. Has fruited successfully as far north as Winnipeg. Red, free-stone and of high quality.

UNDERWOOD

SUPERIOR. Of all the plums yet introduced by the State Fruit Breeding Farm, Superior is the largest. It is also one of the heaviest bearing plum varieties known. In its flavor, color, texture, size and productivity, it has proven itself worthy of its new name—Superior. It has also shown itself a splendid pollenizer for several of the other varieties.

MONITOR. Late. If blue ribbons were being given out, Monitor would be awarded three; yes, four. One for a vigorous, strong growing tree; one for regular bearing; another for excellent shipping and market qualities, and a fourth for delicious flavor. Color is red, slightly russeted. Unquestionably one of the finest plums.

TONKA. Early mid-season, very heavy bearing at an early age. The fruit is large, attractive bright red color. Pit is small, entirely free-stone, quality good, flavor sweet.

ELLIOT. It would be hard to improve on Elliot for a late variety. Fruit large, attractive, bright clear red; fine flavor, splendid quality, free-stone. Since the introduction of these plums Elliot has maintained the most uniformly heavy production of the entire group. No home or commercial planting is complete without Elliot.

THE POLLINIZER PLUM

HANSKA. Bright red, large; firm yellow flesh of good quality. Especially important as a pollenizer for Underwood.

BEARING AGE TREES

Extra Large Ready to Fruit

For Those Who Want Quickest Results

Many of you have asked us at some time or other for extra large trees that will bear fruit in the shortest possible time. To supply your wants we have grown a block of fine, two-year-old trees. Some of these have already blossomed in the nursery row, most of them have fruit buds now and should bear some fruit this summer. Without exception they should produce fruit next year. If you want the largest, finest trees available, big roots and heavy tops that will be the envy of the neighborhood and that will bear for you almost immediately, order DANIELS EXTRA LARGE, BEARING AGE TREES.

DANIELS HARDY CHERRIES

At last we can grow cherries in the cold North. Into these splendid new varieties have been bred the hardiness and very early bearing characteristics of their sand-cherry parents together with the high dessert and canning qualities of their true cherry ancestors. We offer this year an especially fine stock of these valuable new varieties at pleasingly low prices.

OKA—A tremendous yielder of large round cherries fully one inch in diameter. Dark red outside with a juicy, purple meat inside. Wonderfully sweet. The best of all the purple fleshed cherries.

ZUMBRA—The best sweet cherry type for Minnesota. Bears early. A tremendous yielder. When properly ripened on the tree the fruits are delicious to eat out of hand and one of the finest canning fruits known.

ZUMBRA

	PRICES	
	1	10
2nd size80	7.00
1st size	1.00	8.50
Bearing Age	1.25	11.00

COMPASS—While this fine old variety is not the equal of the other three cherries in quality it is a most acceptable and popular fruit for canning. It is the best pollenizer known for the other cherries and should be included in all plantings.

GRAPES

Concord

BETA—The standard hardy grape. Very productive; yields of from 1/2 to 1 bushel per vine are not uncommon in well cared for vineyards. Hardy grapes have been one of the most profitable fruit crops in recent years. Price: 25c each; \$2.50 for 12; \$4.50 for 25; \$17.00 for 100.

ALPHA—The improved Beta. A more recent introduction than Beta but preferred to it by many of those who have grown both. Similar in production and has most of the Beta characteristics but is commonly considered to be of better flavor than Beta. 30c each; \$3.00 for 12; \$5.50 for 25; \$20.00 for 100.

CONCORD—The most popular table grape and the most widely grown of the blue dessert grapes. It is the standard of comparison for all other grapes. 25c each; \$2.50 for 12; \$4.50 for 25.

DELAWARE—The finest red grape. If you are looking for a beautiful, reliable grape of the very finest quality, Delaware, with its unequalled spiciness and sweetness, will fill the bill. 35c each; \$3.50 for 12.

NIAGARA—America's leading green grape. Splendid quality; very productive. Niagara holds the same enviable place among green grapes that Concord does among the blue ones. 35c each; \$3.50 for 12.

GOOSEBERRIES

CARRIE. The Thornless Gooseberry. Carrie has been the most popular gooseberry in Minnesota and adjacent states in the past. It is a prolific yielder of good sized berries which ripen red. Sometimes called the thornless gooseberry because the prickles are lost from the wood after the first year. 1yr. 20¢ each; \$2.00 for 12; \$3.75 for 25

2yr. 30¢ each; \$3.00 for 12; \$5.50 for 25

COMO. Minnesota's New Wonder Gooseberry. (Minnesota No. 43.) Described by the originators, the Minnesota State Fruit Breeding Farm, as follows:

"A vigorous, productive plant with exceptionally healthy foliage. Fruit roundish or slightly oblong. Ripens green, quality fair, holds on the bushes a long time in good market condition without scalding, even in the hottest weather. The plant is only moderately thorny, many thorns dropping from the two year old wood."

The advent of Como marks the greatest advancement made in mid-western gooseberry culture in many years. 1yr. 25¢ each;

\$2.50 for 12; \$4.50 for 25
2yr. 35¢ each; \$3.50 for 12; \$6.50 for 25

CURRANTS

RED LAKE (Minnesota No. 24). The finest of all currants has just received the final approval from the State University and been given the name "Red Lake." Red Lake has undergone thorough testing for several years at the Minnesota Experiment Station, and throughout the Northwest, wherever tried, it has shown a marked superiority over all other varieties. It is of splendid quality, exceptionally large with long clusters well filled to the tip. Ripens early mid-season but holds on for a long period so that it can be marketed when prices are highest. Professor Alderman states that he believes it is the largest fruited and heaviest yielding currant in Minnesota. Supplies of this wonderful currant are limited, so we urge early ordering

1yr. 30¢ each; \$3.00 for 12; \$5.50 for 25.
2yr. 50¢ each; \$5.00 for 12; \$9.50 for 25

PERFECTION. Probably the finest of the older varieties of currants for home use.

2yr. 35¢ each; \$3.50 for 12; \$5.50 for 25

Latham Raspberries (Natural Size)

Daniels Latham Raspberry

(Mosaic Free)

"The Country's Greatest Late Red"

This, the finest and most profitable of all late red raspberries, was also originated at the Minnesota Fruit Breeding Farm. Because of its marked superiority it has replaced all older late red raspberries throughout the East as well as in the Middle-west.

Latham is a strong grower with exceptionally vigorous canes, well able to support its enormous loads of berries. Hardy throughout most of the Northwest without protection. The berries are of splendid quality, ship well and are famous for their large size, frequently an inch in diameter.

Daniels plants reach you in perfect growing condition, full of pep and ready to give you the finest raspberry growth and productivity you have even seen. Wherever our plants are used they at once become the standard to which other raspberries are compared.

Our high quality, disease-free Latham plants make an ideal foundation for a lastingly profitable raspberry patch.

Plant both Chief and Latham and lengthen the season. They're both wonderful yielders.

One of Our Large Fields of Chief Raspberry Plants

CHIEF

(MOSAIC FREE)

(Minnesota No. 223)

Chief of All Red Raspberries

CHIEF is generally conceded to be the outstanding early, hardy red raspberry for the Northwest. A seedling of Latham, it has practically all the good points of its parent and in addition many others, for it surpasses Latham in hardiness, yield, quality, disease resistance and starts ripening from a week to ten days earlier.

In describing "Chief" Professor W. H. Alderman, Chief in Division of Horticulture, University Farm, writes as follows:

"As compared to Latham, it possesses the advantage or ripening ten days earlier, it is much more resistant to such diseases as mosaic and mildew and slightly more resistant to the disease of anthracnose and spur blight; it is distinctly more resistant to low winter temperatures than Latham; it has outyielded Latham in two carefully conducted tests at the Fruit Breeding Farm; it is of better quality than Latham; it is a more vigorous plant maker and produces stockier canes. As far as I can see the only point where it does not attain superiority over Latham is in the size of the berry. The fruit is somewhat smaller but is large enough for commercial purposes and is, on the whole, rather more attractive than the older variety."

Chief makes an ideal running mate for Latham, furnishing an early berry while Latham furnishes a late one. Throughout the northern part of Minnesota and adjacent severe sections Chief has proven especially popular, for in sections where most other varieties kill to the snow-line Chief comes through without any injury whatsoever.

MARY WASHINGTON ASPARAGUS

The Government's Rustless Asparagus

MARY WASHINGTON ASPARAGUS. The giant asparagus, introduced by the United States Department of Agriculture, is everywhere admitted to be the finest variety grown. It has surpassed all other varieties in yield and quality and proven itself entirely rust proof.

2 year plants: 12 for 50¢; 25 for 75¢; 100 for \$2.00
3 year plants: 12 for 75¢; 25 for \$1.25; 100 for \$3.50

The best Asparagus known

Mary Washington

Ancient Briton Blackberry

The extreme popularity of this splendid blackberry is well deserved for it is not only the hardiest of the better blackberries but is the best in quality. Plants are vigorous and very productive. Probably the best for home and commercial plantings in the North. *select plants 12 for \$1.25 - for \$2.00 ; 100 for \$5.00*

AND EVIDENT PRODUCTION QUALIFICATIONS

Macdonald Crimson

The Famous New
McDonald Crimson Rhubarb
 Highest Color—Highest Quality—Highest Yielding
 The Peer of All Other Rhubarbs

Macdonald is the most talked of rhubarb in America today. And rightly so, for it is undoubtedly superior to all other varieties now in use in this country. We quote below part of a letter recently received by us from Prof. L. G. Bunting of the Macdonald College in Quebec, where the variety was originated and through whom our supply of plants was secured from the College:

Under date of December 12, 1931, Dr. C. F. Patterson, Professor of Horticulture, University of Saskatchewan, Saskatoon, Sask., wrote of the Macdonald rhubarb: "It is without doubt the best variety that we have undertaken to grow. It is in a class by itself. I think this is the unanimous verdict of all that have compared it with other varieties."

The late Hon. J. L. Perron, Minister of Agriculture for the Province of Quebec, and one who conducted quite a large farm, having over an acre of rather inferior rhubarb, said when he saw and was given a sample of the Macdonald variety: "Why! I will have it placed on every farm in Quebec."

I could give you many more favorable reports from many quarters, one just recently from Germany. During the last few years it has been placed in the hands of the U. S. Bureau of Plant Industry, Cornell University, Pennsylvania State College and a dozen other Experiment Stations in the U. S. and every single case on request after having seen the variety, or having heard of it from some one else who had it.

To date we have only placed it in your hands and the firm in New York who received a shipment about the same time you did.

Finally, I would like to give you my own personal opinion of this variety as one who has been growing, handling and eating rhubarb for the past thirty-five years, and that is: "It is a very highly colored, attractive red stalk, of large size, productive, very tender and succulent, and of excellent quality, and particularly valuable for pies and desserts. Its color when cooked without peeling is as attractive as that of raspberries."

Appreciating the tremendous demand for it in this country, Professor Bunting has made arrangements for it to be grown and distributed by two nurserymen in this country, one in the East and one in the West. We are fortunate to be chosen to handle it in the middle west. Our planting of Macdonald, the largest in the country, has been a joy to watch, and a surprise to all who have come to inspect the field because of its large, uniformly red, crisp, tender and mild stalks, and because of its tremendous vigor under dry conditions. Every one who grows rhubarb, whether for home or market, will want some Macdonald, so we suggest ordering early. We offer strong divisions.

WARBA POTATO

The Most Remarkable Early Potato Known
 A Triumph of the Potato Breeders of the
 University of Minnesota

Warba is the heaviest yielding early potato known. We consider it a privilege to be able to offer our customers this year for the first time a stock of the finest new early potato variety yet developed. Warba, which in the Ojibway language indicates earliness, is the result of potato breeding work done by the Division of Horticulture of the Minnesota Agricultural Experiment Station. It is valuable for the early market and for the early home garden. Its outstanding features are earliness, high yield, resistant to common forms of Mosaic disease, uniform size of tubers, excellent cooking quality and vines so compact and upright as to facilitate cultivation and spraying.

The tubers run unusually uniform in the hill. They are short, round, blocky and white with pink eyes.

During the past five years of extensive testing of this variety it has consistently shown high productivity. In comparative tests in the hands of large growers throughout the state it has consistently shown much higher productivity than the Irish Cobbler. In various tests at the experiment station it has consistently produced larger crops in shorter time than any of the other early varieties.

This outstanding high yield in comparison to other varieties is especially significant in light of its early maturity. Warba season is from 10 to 14 days shorter than Irish Cobbler and 7 to 10 days shorter than Early Ohio and Bliss Triumph. The vines of Warba are less injured by high temperatures than Bliss Triumph and tend to remain green until they normally mature. The flesh is conspicuously white and crisp and the cooking quality is excellent.

The Mosaic disease as commonly found in Minnesota has never been found in Warba. Throughout two winters of inoculation tests in the greenhouse and the third winter using tuber grafts and leaf inoculation no Mosaic symptoms appeared in Warba.

Warba

In no other variety of potato can the same wonderful characteristics of Warba be found, for according to experiment station and commercial growers' records, Warba excels all other early varieties in earliness, yield, uniformity of size and quality.

Whether you grow potatoes for home use or for market you owe it to yourself to get started this year on Warba now that the tubers are available for you.

Our stock is limited so we suggest early ordering. The slightly higher cost of Warba over other potatoes will be much more than compensated for by the outstanding results Warba will bring.

The Famous New **WAYZATA** EVERBEARING STRAWBERRY

Recommended by Minnesota, Wisconsin and Michigan Horticultural Societies.

During the past twenty-five years we have seen many over-bearing strawberry varieties come and we have seen almost with all these varieties we have yet to see one that is in any way near the equal of the famous WAYZATA strawberry.

The plants are large, vigorous and healthy and have been splendid producers. If the variety has any one fault—and most people consider it an asset rather than a fault—it is that it is not a prolific runner maker. This is a splendid quality for the fruit grower as it will make a sufficiently wide row without the competition of surplus or unwanted runner plants. This fact, however, has retarded propagation of the variety and it will probably be many years before it will be as plentiful as other sorts.

Whether for home or market purposes Wayzata leaves little to be desired and is now commonly accepted as the finest thoroughly tested everbearing strawberry known. So far as we know it has been the most profitable in the middle-west of any of the other known everbearers.

The fruit is large, beautifully colored (both inside and out), and the flavor more delicious than that of any strawberry we have ever eaten.

25 for \$1.25; 50 for \$3.22; 100 for \$5.00; 200 for \$9.25
500 for \$19.50

Our hardy, Northern-grown Strawberry plants will afford a pleasant surprise to those who are accustomed to having plants shipped in from distant points as ours are not only thoroughly accustomed to trying northern conditions but are handled and shipped with such dispatch that they reach our customers within a few hours from the time they come out of the ground.

We give unusually careful attention to both the growing and nursery handling of our plants and ship out only strong stock with heavy fibrous roots and large crowns.

THE FOUR FINEST JUNE BERRIES

BEAVER (Extra Early)—Beaver has been called a "worldbeater." A recent introduction of outstanding merit, commonly heralded the most promising of the June bearing varieties. For several years it has surpassed all standard varieties in most sections where tried. You will be interested in the good points claimed for it—Several days earlier and easier to pick than Premier—Good shipper and general market berry—Good color, inside and out—Large—Holds its size well to the end of the season—Equal to Dunlap and Premier in quality—Very heavy yielder—Plants are vigorous and healthy—Splendid plant maker—Hardy. Looks like the best all around June bearing variety to date. If you are interested in a good strawberry, try Beaver.

25 for 50¢; 100 for \$1.25; 1000 for \$6.25

BEAVER

MINNEHAHA. Late. The best late, June bearing variety for a shipping market, being one of the largest, heaviest producing, late berries known. This Minnesota creation has in recent years been an outstanding favorite with the commercial grower and an exceedingly profitable variety.

25 for 50¢; 100 for \$1.25; 1000 for \$8.00

MINNEHAHA

PREMIER (Early)—Aptly described as the one strawberry without a fault. Although nearly a week earlier than Dunlap, it maintains a heavy production over a long period. The firm, bright red berries maintain large size well throughout the season. Because of its "frost-proof" qualities a Premier crop failure is practically unknown.

25 for 50¢; 100 for \$1.25
1000 Only \$6.25

PREMIER

DUNLAP (Mid-season)—Dunlap needs no introduction as it is the best known and most widely grown strawberry in the northern and eastern half of the United States. It is an equally good market or home garden berry, well adapted to all types of soils.

25 for 50¢; 100 for \$1.25
1000 Only \$5.25

DUNLAP

NOTE SPECIAL PRICES:— 25 Only 50¢; 100 Only \$1.25; 250 Only \$2.00; 1000 Only \$8.00

Daniels Progressive plants are a high yielding strain that produces tremendous crops of berries which surpass most other Progressives in size. Since the introduction of Daniels specially selected Progressive strain, it has given universal satisfaction wherever used.

Of all the older everbearing varieties Progressive is admittedly the most generally satisfactory. It is a strong grower and an abundant yielder in almost all soils and climates and is one of the earliest fruiterers both in spring and fall. Plants set this spring will bear crops this summer and fall.

The Standard Everbearer

Our Strawberry Plants will give you real success.

DANIELS HARDY SHRUBS

Pink Flowering Almond

Ornamental shrubs are the backbone of all landscape plantings. Whether one is building an outdoor living room, constructing a foundation planting, or making other border plantings, hardy shrubs are indispensable. Much beauty and individuality may be secured through the varying heights, forms, flowers, barks and foliage found in the different varieties.

Of the hundreds of different shrubs, the ones we are growing have proven themselves the cream of those suited to the Northwest. Every one has its special merit. By selecting the proper assortment for each situation one can build oneself a home landscape of surpassing charm and beauty.

Our plants are infinitely superior to the so-called "bargain" shrubs so frequently offered where one has no assurance of size and quality, but is simply offered some meaningless description as "2-year-old," double X or triple X. The plants we offer are well grown with good tops and roots—unusually fine plants for the low price we ask. Twelve of one kind for 10 times the each price.

ALMOND (Pink Flowering)—4 to 5 ft. Twigs completely covered with rose like, pink flowers in early spring. 2-3 ft., 60c; 3-4 ft., 75c.

BARBERRY (Japanese, Thunbergi) — Low, compact growing shrub much used for border or hedge plant or for group plantings. Stands shearing well. Foliage turns a bright crimson in autumn and bright scarlet berries add color all winter. 12-18 in., 25c; 18-24 in., 35c; 2-3 ft., 50c.

BARBERRY (Red Leaved)—2 ft. First foliage a warm bronzy red; the heat of the summer intensifying its red brilliancy; autumn adding other tints to its richness. Abundant scarlet berries persist through winter along the spiny twigs. A sunny exposure is necessary to bring out and retain its full red color. 12-18 in., 40c; 18-24 in., 60c; 2-3 ft., 80c.

BUCKTHORN (Common)—12-15 ft. Hardy vigorous shrub with lustrous leaves and black berries. Desirable for groups and for hedges. Stands shearing well. 2-3 ft., 30c; 3-4 ft., 50c; 4-5 ft., 75c.

BUCKTHORN (Frangulea)—6-7 ft. Finer leaves than the Common Buckthorn. Glossy deep green. Produces red berries in the fall. An excellent border shrub. Does well in low places. 2-3 ft., 35c; 3-4 ft., 50c; 4-5 ft., 75c.

CARAGANA (Siberian Pea Tree)—10-12 ft. The hedge plant for the North. Extremely hardy. Strong thrifty grower. Branches numerous and artistic in growth with innumerable small, sharp thorns that make the hedge more effective. Blossoms are pea like and lovely canary yellow color, coming forth in small clusters in late spring. Fine for border or group plantings also. 2-3 ft., 40c; 3-4 ft., 60c; 4-5 ft., 90c.

Cotoneaster

Snowberry

Hydrangea Hills of Snow

CORALBERRY (Red Snowberry)—3-4 ft. A slender branching upright shrub, valuable for planting in shady places. Red to purple berries in late summer and fall. Entirely hardy and grows where other plants fail. 18-24 in., 35c; 2-3 ft., 50c; 3-4 ft., 60c.

COTONEASTER (Quince Berry)—6 ft. A handsome shrub, well meriting its popularity. Dense growing with ornamental, dark, glossy green leaves. Very desirable for foundation plantings. Small pink blossoms in early spring followed by black berries throughout fall and winter. 18-24 in., 25c; 2-3 ft., 40c; 3-4 ft., 60c.

CRAB (Bechtel's)—10-15 ft. A splendid, tree-like shrub. Covered in spring with intensely double rose-like pink blossoms. Used as a shrub or is a desirable lawn specimen. 2-3 ft., 60c; 3-4 ft., \$1.25; 4-5 ft., \$2.00.

DOGWOOD (Red Twigged)—6-7 ft. Good for border groupings, where the smooth, slender, bright red branches in winter make a very pleasing contrast with evergreens and snow. Small white blossoms early in summer, succeeded by a fall crop of ornamental berries. Good foliage. 18-24 in., 30c; 2-3 ft., 40c; 3-4 ft., 60c; 4-5 ft., 85c.

DOGWOOD (Variegated-leaved) — 4-5 ft. Highly decorative because of its white striped green leaves and red bark. An outstanding shrub wherever used. 18-24 in., 50c; 2-3 ft., 75c; 3-4 ft., 85c.

ELDER (Cut-leaf)—6-7 ft. Great handsome cymes of delicate, white, fragrant flowers in June and July, followed by large clusters of fruits. 2-3 ft., 50c; 3-4 ft., 75c; 4-5 ft., 90c.

ELDER (Golden-Leaf)—6-7 ft. The gorgeous golden beauty of this splendid hardy shrub makes a wonderful background, and its bushy, vigorous growth makes the most effective sort of a screen. Plant it in a sunny place, and its golden beauty will more than repay you. Will thrive in moist places. 2-3 ft., 50c; 3-4 ft., 75c; 4-5 ft., 90c.

HONEYSUCKLE (Morrows) — 5-6 ft. A distinctive type. Semi-spreading, drooping branches. White flowers in June followed by brilliant red fruits in August. Foliage grayish-green hue, pubescent. A charming color variation in the border planting. 18-24 in., 30c; 2-3 ft., 50c; 3-4 ft., 75c; 4-5 ft., 90c.

HONEYSUCKLE (Tartarian, Pink) — 8-10 ft. Strong, upright growing shrub which thrives under all conditions. Produces an abundance of pink flowers in May followed by masses of red fruit in autumn. 18-24 in., 30c; 2-3 ft., 40c; 3-4 ft., 60c; 4-5 ft., 90c.

HONEYSUCKLE (Tartarian, White) — 8-10 ft. Similar in manner of growth to the Pink Honeysuckle. The blossoms are white. Attractive bright red berries make the bush especially attractive in August. 18-24 in., 30c; 2-3 ft., 40c; 3-4 ft., 60c; 4-5 ft., 90c.

HYDRANGEA (Hills of Snow) — 3-4 ft. Blooms from June until frost. The flowers are large, snow white, and produced in abundance. Valuable also because it comes when blooms are scarce, just after the abundance of blossoms of spring. A fine shrub for shady locations. 12-18 in., 25c; 18-24 in., 40c; 2-3 ft., 50c; 3-4 ft., 75c.

Form, foliage color and season of bloom are all important in making shrub selections. J.P.D.

DANIELS HARDY SHRUBS

HYDRANGEA (Pee Gee)—3-4 ft. A beautiful shrub with leaves of bright, glossy green; flowers borne in huge pinacles from 8 to 12 inches long, light pink, changing to brown later in the fall. Blooms in August and September. The blooms are very lasting and may be cut and taken into the house without losing either color or size. 12-18 in., 25c; 18-24 in., 40c; 2-3 ft., 50c; 3-4 ft., 75c.

LILAC (Common Purple)—6-8 ft. The well-known, old fashioned purple lilac. Your home landscape needs its exquisite purple colorings and sweet fragrance. 18-24 in., 25c; 2-3 ft., 35c; 3-4 ft., 50c; 4-5 ft., 90c; 5-6 ft., \$1.50.

LILAC (Common White)—6-8 ft. Similar in habit of growth to the Purple Lilac but produces fine, lacy-like blooms, fragrant. 18-24 in., 25c; 2-3 ft., 35c; 3-4 ft., 50c; 4-5 ft., 90c.

LILAC (Persian)—6-7 ft. Slender growth, fine leaves and many branchings. Does not sucker like the common varieties. Pale, purple flowers early in the season. 18-24 in., 30c; 2-3 ft., 40c; 3-4 ft., 60c; 4-5 ft., 90c.

MATRIMONY VINE—Used both as a low shrub and as a vine. Very successful as a ground cover and soil retainer on steep slopes and embankments. Produces large numbers of purple flowers which are succeeded by bright scarlet berries sometimes almost an inch long. It blooms throughout the summer and the fruit remains on the vine until late in the winter. 2 yr., 40c; 3 yr., 60c.

MAPLE (Tartarian or Ginnala)—6-8 ft. A dwarf shrubby tree with handsome, finely cut leaves. Attractive clusters of winged seed pods. Leaves turn to a brilliant shade of crimson in the fall. 2-3 ft., 40c; 3-4 ft., 60c; 4-5 ft., 90c.

MOCK ORANGE (Coronarius)—5-6 ft. Sweet scented. A hardy, vigorous growing shrub valuable for many locations and loved because of its pure white, sweetly scented flowers which are borne in profusion in June. 18-24 in., 35c; 2-3 ft., 50c; 3-4 ft., 75c; 4-5 ft., 90c.

MOCK ORANGE (Grandiflora)—8-10 ft. Large flowering. Fairly covered with large, creamy white flowers in early summer. Unrivalled for screening or back ground in a heavy planting. 18-24 in., 35c; 2-3 ft., 50c; 3-4 ft., 75c; 4-5 ft., 90c.

MOCK ORANGE (Virginal)—6-7 ft. A magnificent New Mock Orange. It has large petals, double crested white flowers, five to seven in a cluster, sweet scented and a long blooming season. This shrub should be in every planting. 18-24 in., 40c; 2-3 ft., 60c; 3-4 ft., 90c; 4-5 ft., \$1.25.

OLIVE (Russian)—10-12 ft. While this plant really is a small tree; yet when it is kept pruned rather severely, it forms a most attractive shrub. Its foliage is of a remarkable silvery-hue, showing up in striking contrast to the green of other shrubs and trees. Has fragrant yellow flowers, followed by yellowish-green fruits. Very hardy. 2-3 ft., 35c; 3-4 ft., 50c; 4-5 ft., 75c; 5-6 ft., \$1.00.

Hydrangea Pee Gee

Persian Lilac

Mock Orange Philadelphus Virginal

Spirea Van Houtte

PLUM (Newport)—10-12 ft. The best red-leaved tree for the north. Origination of the Minnesota Fruit Breeding Farm. A very desirable shrub or small tree to use where red foliage effect is desired. The leaves are smooth and richly colored a very bright red. This color is held throughout the season. A slow growing tree of great refinement. 3-4 ft., 75c; 4-5 ft., \$1.25.

PLUM (Double Flowering or Rose Tree of China)—6-7 ft. A beautiful shrub or small tree. In early spring, just as the leaves begin to start, the branches are covered with small, very double, rose-like flowers an inch in diameter. The whole tree is decked in a fleecy cloud of very double light pink blossoms. 18-24 in., 35c; 2-3 ft., 50c; 3-4 ft., 75c; 4-5 ft., \$1.25.

SPIREA ANTHONY WATERER—18-24 in. A very popular low growing bush, constantly in bloom all summer. Flower clusters large, flat topped and of deep rose color. The leaves are frequently variegated yellow and red. 12-18 in., 35c; 18-24 in., 50c; 2-3 ft., 75c.

SPIREA ARGUTA SNOW GARLAND—4-5 ft. A Japanese variety of stiff irregular growth with white flowers which completely cover the twigs before the leaves appear in the spring. Attractive light, feathery foliage. One of the first shrubs to bloom in the spring. Splendid in a foundation planting. 18-24 in., 35c; 2-3 ft., 50c; 3-4 ft., 75c.

SPIREA BILLARDI—4-5 ft. Sometimes known as the Pink Summer Spirea. Tall, erect shrub with canes terminated by feathery plumes, 5 to 8 inches long, of dainty pink color. Blooms when other shrubs are out of flower. 18-24 in., 35c; 2-3 ft., 50c; 3-4 ft., 75c.

SPIREA FROBELI—2-3 ft. A low, bushy shrub of the Anthony Waterer type, but more sturdy in habit. Canes distinctly reddish; young foliage tinged red. Flowers rose color. Brilliantly colored in autumn. 12-18 in., 25c; 18-24 in., 35c; 2-3 ft., 50c.

SPIREA VAN HOUTTE—5-6 ft. This is the most popular of all the spireas, and is more largely planted than any other one shrub. Its graceful arching branches heaped as they are with the white blossoms in spring and its thriftiness under the most trying conditions are the reasons for its popularity. It is adapted to many purposes in outdoor decoration and wherever it is put gives beauty and cheer in return. 18-24 in., 25c; 2-3 ft., 35c; 3-4 ft., 50c; 4-5 ft., 75c.

SNOWBERRY (Waxberry)—3-4 ft. A rather low growing shrub with small pink flowers followed by large clusters of white berries which hang on until winter. Has an attractive bright foliage throughout the season. 18-24 in., 35c; 2-3 ft., 50c; 3-4 ft., 60c.

TAMARIX (Salt Cedar)—6-7 ft. Will grow on any soil and under any conditions. Has feathery, silvery-gray green foliage, with long pinnacles of deep pink flowers. A distinctive type of shrub. 2-3 ft., 50c; 3-4 ft., 75c.

These three dozen are probably the hardiest and most generally useful of the shrubs; but we have many, many more varieties at home. Write - or better yet, drop in and see them.

Don't forget that shrubs with berries will attract the birds and "pep up" the winter landscape.

DANIELS QUALITY

ROSES

Daniels Eskimo Roses

The Hardest Everbloomers

Large 2 year No. 1 plants, 60c

HANSA. Deep Red—One of the hardest, most dependable and most all round satisfactory of the red roses. The large, double flowers have an attractive violet tinge, and are produced in great abundance from early summer until late fall. The plants are vigorous growers with shiny green foliage and hardy enough to stand the most severe climate without protection. If you love red roses in profusion all season in the shrub border, the rose garden or as a hedge then plant Hansa. It never disappoints!

CONRAD F. MEYER. Silver Pink—One of the finest pink roses of the real hardy sorts. It is an unusually strong grower with foliage, color and stem that are most attractive throughout the entire growing season. The large double showy pink flowers have the penetrating fragrance of the old fashioned June roses and are borne on long, sturdy stems.

SIR THOMAS LIPTON. Snowy White—The large, double, pure white blooms of this splendid variety are borne continuously in clusters on strong stems. The foliage is a very attractive dark leathery green. An outstanding favorite.

F. J. GROOTENDORST. Bright Crimson—A new variety of unusual merit commonly called "The baby Rambler rugosa rose." This delightful cross between the red rugosa and the crimson baby Rambler has perpetuated the best qualities of both parents. It has the typical rugosa foliage, health and manner of growth, with the size, type and profuseness of bloom of the baby Rambler. Because of its iron-clad hardiness it may be used in shrub borders.

Frau Karl Druschki

Hansa.

DANIELS HARDY VINES

Nothing provides a home-like and restful appearance more quickly than a covering of green vines for blank walls, bare fences and arbors. We are particularly fortunate in being able to offer the finest specimen vines we have had for many seasons.

BITTERSWEET—"A spray of bittersweet is a lasting thing. Puffed from the fence in pine-sweet woods, first fall the leaves, next splits orange calyx fair—revealing the crimson heart; and so throughout dull wintertime it stays, a bold bright memory of Autumn days." Always plant three or more vines to be sure of an abundant production of berries. 2 yr., 50c; 3 yr., 75c.

SCARLET TRUMPET HONEYSUCKLE—This splendid variety with its interesting twining method of growth is generally considered the finest of the honeysuckle vines. Brilliant yellow throated scarlet flowers. Long blooming period. 2 yr., 50c; 3 yr., 75c.

VIRGINIA CREEPER (American Woodbine)—Entirely hardy. A quick strong grower. Brilliant red fall foliage. 2 yr., 40c; 3 yr., 60c.

VIRGINIA CREEPER (Engelmanni)—The best hardy vine for brick, concrete or stucco surfaces. Much smaller foliage and thicker than the common variety of Creeper. Red fall foliage. 2 yr., 40c; 3 yr., 60c.

Buckthorn Hedge.

A fence which gives no offence.

The proper use of hedges add immeasurably to the attractiveness of one's home grounds. They will effectively mark a boundary line, serve as a screen, or furnish a pleasing background for an informal planting. If we treat the garden as a logical extension of the house, the walls form a chief link between the two elements. Here, as in everything else a sense of fitness must be observed.

Very often home grounds that seem utterly wasted when open take on a new character and charm when enclosed. Indeed the hedge wall introduces values beyond those of protecting and screening.

Daniels Hedging Shrubs

Living, Lasting Fences

In this group we offer fine, strong plants, suitable for starting live fences. These are well grown, strong rooted hedging size specimens which will give quick results.

For descriptions see pages 4 to 8.

Climbing Roses

EXCELSA (Red Dorothy Perkins)—Probably surpasses all other climbing roses in hardiness and the equal of any of them in general desirability. The clean, healthy leaves, are bright glossy green, making it exceptionally valuable when not in bloom. Flowers are large for a climbing rose, very double and are born in clusters. The bright crimson petals are tipped with scarlet. Large sized plants, ready to bloom. 60c each.

GARDENIA—Of all the climbing roses there is no yellow one so satisfactory as the Gardenia. Not only is it the hardest of the yellow roses, but it is also a strong grower and a free producer of beautiful yellow blooms. 60c each.

PAUL'S SCARLET CLIMBER—Called by some "The Reddest Rose That Grows." Intense scarlet coloring, holding its brilliant color until the petals fall. Blossoms are large, semi-double and cling to the bush for an unusually long time. Hardy and a vigorous grower. No other rose will give the same effect. 60c each.

DR. VAN FLEET—A climbing rose of unsurpassed merit, combining vigorous growth, unusual beauty and intense fragrance. The enormous flowers of light pink, shading deeper at the center are borne singly on stems of unusual length so that it is a splendid rose for cutting purposes. Considered by many to be the best of all climbers. 60c each.

Bush Roses

HUGONIS (Golden Rose of China)—Bears single flowers in long, arching spray. Perfectly hardy. Makes a large, shapely shrub of 6 feet in height and blossoms about the same season as Spirea Van Houtte. 60c each.

FRAU KARL DRUSCHKI (Hybrid Perpetual)—Often called the Snow Queen. White. This most beautiful of the white roses is commonly called the White American Beauty. Its unusually attractive, long pointed buds are followed with large pure white, perfectly formed double blooms, frequently six inches in diameter. Blooms in June and all summer. 60c each.

PAUL NEYRON (Hybrid Perpetual)—Pink. One of the finest roses for outdoor culture and one of the largest. The clear pink blooms which shade to a beautiful rose are borne from June until frost on long, smooth, thornless stems. Delightful fragrance. Fine fall bloomer. One of the most popular roses. 60c each.

GRUSS AN TEPLITZ (Hybrid Tea)—Crimson. Probably the best of all crimson roses for garden decoration. It blooms freely from June until frost, topping the shapely, vigorous plant with large, fragrant, crimson-scarlet flowers of intense depth and richness of color. Needs winter covering. One of the showiest of garden roses. 60c each.

HARRISON'S YELLOW—Yellow. A splendid old favorite and one of the finest shrubby types for the yard. Early in the season the entire bush is covered with a mass of beautiful, fragrant roses of deep golden yellow. One of the hardest of the roses and suitable to all locations. 60c each.

6 Roses for \$ 3.00

DANIELS

LAWN

TREES

No outdoor living room is complete without the cool shade of properly placed trees. Then too, they furnish a suitable framing for both close and distant views in the landscape and when used for screening effects add a comfortable feeling of privacy. Our hardy Northern grown trees have well developed root systems which insure you quick and certain growth.

ASH, AMERICAN WHITE—A tall growing native tree. Straight, clean growth, round head and dense foliage. In autumn the foliage coloring is unusually beautiful. 5-6 ft., 60c; 6-8 ft., 75c; 8-10 ft., \$1.00; 1½ in., \$2.00; 2 in., \$2.50; 2½ in., \$3.50; 3 in., \$5.00.

ASH, MOUNTAIN—One of the most popular of the small lawn trees. White flowers in spring followed by large clusters of orange red berries which remain throughout the winter. Graceful spreading branches and finely cut foliage. 4-5 ft., 75c; 5-6 ft., \$1.00; 6-8 ft., \$1.50; 8-10 ft., \$2.00; 1½-2 in., \$2.75; 2 in., \$3.50; 2½ in., \$4.50.

BIRCH, WHITE—A beautiful, graceful, upright growing tree famed for its attractive bark. A favorite for lawn tree planting. Effective when planted singly or in groups. If planted three or four in one clump one will get the natural effect of native growing trees. 5-6 ft., \$1.00; 6-8 ft., \$1.50; 8-10 ft., \$2.25; 1½ in., \$3.50; 2 in., \$4.00.

BIRCH, CUTLEAF WEEPING—One of the most admired of all lawn trees. Distinguished for its unusual grace in character and outline. Its white bark, long drooping branches and finely cut foliage give a particularly artistic touch to the landscape. 5-6 ft., \$2.00; 6-8 ft., \$2.75; 8-10 ft., \$3.75; 1½ in., \$4.50; 2 in., \$5.50.

CRABAPPLE, HOPA—A very attractive ornamental tree with large red blossoms in the spring followed by red fruits. Leaves color beautifully in the fall. 3-4 ft., 75c; 4-5 ft., \$1.00; 5-6 ft., \$1.50; 6-8 ft., \$2.00; 1½ in., \$3.00.

ELM, AMERICAN—The most popular tree for shade, street and lawn plantings. A rapid grower and long lived. 5-6 ft., 50c; 6-8 ft., 75c; 8-10 ft., \$1.00; 1½ in., \$2.00; 2 in., \$2.50; 2½ in., \$3.50; 3 in., \$5.00; 3½ in., \$8.00; 4 in., \$12.00.

ELM, CHINESE—A new shade tree introduced from China. A very rapid grower with slender, wiry branches. One of the first trees to leaf out in the spring and the last to shed its leaves in the fall. Remarkably free from insects and diseases. Very hardy and has proved valuable under a greater variety of climatic and soil conditions than any tree yet introduced. 3-4 ft., 25c; 4-5 ft., 50c; 5-6 ft., 75c; 6-8 ft., \$1.00; 8-10 ft., \$1.50; 1¼-1½ in., \$2.25; 1½-2 in., \$2.75; 2 in., \$3.25.

Chinese Elm

American Elm.

Lombardy Poplar

HARD MAPLE (Sugar Maple)—One of the most desirable shade and ornamental trees. A symmetrical tree of great beauty. Deeply lobed, dark green leaves taking on beautiful vivid tints in the fall. 6-8 ft., \$2.00; 8-10 ft., \$3.00; 1½ in., \$4.00; 2 in., \$5.00; 2½ in., \$6.00; 3 in., \$7.50.

NEWPORT RED FOLIAGE PLUM—A beautifully colored plum tree. Valuable as a specimen tree or in the border because of its highly colored purplish-red foliage. The color persists through the entire year and is especially emphasized as the brightly colored new tips, which push out during the season, are contrasted against the duller hue. 5-6 ft., \$1.50.

BOLLEANA POPLAR—Probably the most desirable of all the slender, upright growing trees. Its spire-like, columnar form and glossy green leaves with downy white undersides have made it exceedingly popular where a strong vertical accent is desired in the landscape. 4-5 ft., 75c; 5-6 ft., \$1.00; 6-8 ft., \$1.25; 8-10 ft., \$1.50; 1½ in., \$2.50; 2 in., \$3.50; 2½ in., \$5.00.

LOMBARDY POPLAR—A hardy, quick-growing ornamental tree of especial value where a slender upright form is desired. 4-5 ft., 35c; 5-6 ft., 50c; 6-8 ft., 75c; 8-10 ft., \$1.25; 1½ in., \$2.00; 2 in., \$2.50; 2½ in., \$3.50.

BLACK WALNUT—A hardy nut tree that is rapidly increasing in popularity for ornamental purposes for, in addition to being a splendid shade tree it is a heavy producer of deliciously flavored, meaty nuts. The high value of the wood for manufacturing purposes has rapidly depleted the native stocks of these trees and has made the increased planting of them especially desirable. 4-5 ft., 75c; 5-6 ft., \$1.00; 6-8 ft., \$2.00; 8-10 ft., \$3.00.

NIobe WEEPING WILLOW—The best of the weeping willows. While it is a rapid grower it is perfectly hardy. A clean type of tree, free from litter of broken branches and other trash so common in some willows. Its form is that of a graceful weeping tree and this, with its beautiful golden bark, makes it exceedingly attractive both in summer and winter. 5-6 ft., \$1.00; 6-8 ft., \$2.00; 8-10 ft., \$2.50; 1½ in., \$3.00; 2 in., \$4.00.

GOLDEN WILLOW

The Best of the Russian Willows. The bark is a handsome yellow throughout the year. Valuable in windbreaks and splendid as a quick growing Shade Tree.
